

KEY-SEC

WATERPROOF SECURITY KEYPAD

- **Security Keypad** designed for **access control** and system settings within security application.
- **Fully customizable** interface with backlight and feedback buzzer.
- Made of **ultra-durable materials** for harsh industrial environments.
- **Fully waterproof** for external installation on vehicles, trailers and equipment.
- RS232 or one-wire communication protocols.

TECHNICAL FEATURES

POWER SUPPLY	9-36 Vdc
HMI	n. 14 keys with integrated backlight n. 2 monocolour led (red and green) n. 1 buzzer (max 60 dB, configurable)
COMUNICATION	RS232 baud rate 9600 8N1 One-wire 5V (Standard)
COMMAND	up to 20 ON/OFF commands (toggle switch or pushbutton) from 1 to 7 linear levers/potentiometers or up to 3 joysticks (dual-axis) Up to 5 side pushbuttons
CONNECTIONS	Cable - with micro-fit MOLEX connector
TEMPERATURE	Operative: -20+80°C Storage: -40+80°C
ENCLOSURE MATERIAL	Silicone + PC (UL94 V0)
PROTECTION	IP67
INSTALLATION	Wall mounting x3 M3 threaded insert, 5mm lenght
SIZE	60 x 90 x 14 (D) mm

STANDARDS

APPROVALS	CE (EMC) UKCA (EMC)
